

Missouri Board for Architects, Professional Engineers, Professional Land Surveyors and Landscape Architects

Dimensions

VOLUME 5, ISSUE 1

FALL 2005

CHAIRMAN'S LETTER

By: James S. Anderson, PLS

During the 2005 legislative session, two bills were introduced that would have changed the types of discipline administered by the Board. The two bills were Senate Bill No. 278, sponsored by Senator Gary Nodler and House Bill No. 482, sponsored by Representative Bob Dixon.

Section 327.631(3) currently states that if the Administrative Hearing Commission determines there are grounds for discipline, a license can be censured, placed on probation for no more than five years, suspended for no more than three years, or revoked. Senate Bill 278 and House Bill 482 had provisions allowing a civil fine to be levied, in addition to the other forms of discipline.

The associations which represent architects, professional engineers, professional land surveyors, and landscape architects favored the idea of civil penalties for several years and were instrumental in the effort to get the bills passed. Due to the hard work of many people, the bill came closer to passing this year than at any time in the past. Senator Nodler and Representative Dixon were very supportive of the associations' efforts and the hearings were well attended by representatives of our professions. Matt Kaufmann, of AIA Missouri, took the lead in testifying for the bills and made numerous trips to Jefferson City to support the bills.

As is the case with most bills, there were

compelling questions asked about the idea of the Board being able to levy fines. If the concept of fining is sound, we should be able to answer those questions. The two most significant questions asked were: 1) would this law give the Board too much power, allowing a possibility of abuse; and, 2) since the number of injunctions filed by the Board is so small, is unlicensed practice really a serious problem?

The idea of the Board having too much power is a valid concern. The Board should have the power to enforce the law, but there does need to be a reasonable limit to that power. If no limits existed, the Board could have the power to issue fines gratuitously for minor offenses. Having a system that would allow the Board to fine, or otherwise discipline, without due process, would not be desirable however unlikely it is to occur.

The disciplinary process is defined in Section 327.441. According to that section, if the Board believes there is reason for discipline, a complaint may be filed with the Administrative Hearing Commission (AHC). The AHC will proceed with hearing the complaint in accordance with Chapter 621. These proceedings can include discovery, depositions, and trial before an AHC judge. As with most legal proceedings, the hearing can be expensive and time consuming. However, it does provide due process before a licensee can be disciplined. It is important to note the Board has no legal authority to determine if a violation has occurred. The AHC determines if the law was violated. The Board determines the discipline, but only after the AHC rules a violation has occurred. When you consider how deliberate the process is and that the determination of a violation rests with the AHC, I believe it would be most difficult, if not impossible, for the Board to levy fines in an inappropriate manner.

The question about the small number of injunctions being filed is understandable when the statistics on complaints are considered. Over the past seven years, the Board has received a total of 697 complaints, or almost 100 per year. About 37% of the complaints received alleged practice by an unlicensed individual. Over the same seven year period, the Board obtained a total of eight injunctions. Eight injunctions over a seven year period would not seem to suggest that unlicensed practice is a significant problem.

Although the Board receives a large number of unlicensed practice complaints, most are resolved without great difficulty. The majority of the unlicensed practice complaints (over 60%) are resolved by the person voluntarily agreeing to discontinue the practice they are not licensed to offer. In most of those instances, the person was not intentionally violating the law, but was either unaware or unclear about what the law says. Approximately another 30% of the complaints are closed because there was insufficient evidence, the complaint was not within the Board's jurisdiction, or there was not a violation. As you can see, most complaints are resolved without the need for discipline. Unfortunately, there are a few that are more serious and difficult to resolve and pose a risk to the safety or the property of the public.

Often, these complaints involve design by an unlicensed person. In some cases, the unlicensed design would be considered incompetent if performed by a licensee and may pose a safety risk to the public. Other complaints involve people who have allowed their license to expire or have had their license revoked, but continue to practice, apparently without fear of discipline. Still other complaints involve people who have practiced in Missouri, but reside in another state. Injunctions might be effective in some of these cases, but in others, such as non-residents, they may be ineffective. An unlicensed, or licensed, person making their living in another state may be unaffected by an injunction in Missouri, regardless of the severity of the infraction. Although few complaints of unlicensed practice result in discipline, having the option to impose

either a civil penalty or an injunction may provide a more effective means of dealing with the more serious cases.

The mission of the Board is to protect the inhabitants of the state of Missouri. Typically, complaints are filed after a violation has resulted in some type of damage. The act of imposing discipline does not necessarily rectify the damage. The most effective way to protect the inhabitants of Missouri would be to prevent violations and the harm they cause. If the threat of civil penalties would reduce the number of violations and complaints, the public would be much better served.

ARCHITECTURAL DIVISION LETTER

By: Charles C. Hill,
Division Chair

The annual meeting of the National Council of Architectural Registration Boards (NCARB) took place in June. Usual issues concerning reciprocity/comity, IDP, continuing education, legislation, etc. were discussed. The featured speaker, however, addressed an issue concerning health, safety, and welfare that licensing boards have not traditionally shown much concern about; global warming and energy consumption.

Energy Consumption and Pollution:

When thinking of gross energy consumption, we typically look at gas-guzzling SUV's and other automobiles. Relatively speaking, the automotive industry has done a fair job (under strong regulatory requirements) compared to the construction industry. Edward Mazria, architect and author of The Passive Solar Energy Book was the key note speaker. His presentation and an article by Christopher Hawthorne are the prime source of information below.

U.S. energy consumption by sector "exposes architecture as the hidden polluter" with 48% of total energy con-

sumed for the production and maintenance of the built environment. Industry consumes 25% and transportation consumes 27%. Similarly if we look at CO2 emissions by sector in the year 2000, the built environment was responsible for over 700 million metric tons, the transportation industry for 450 million tons, and industry just over 260 million tons. By these measures, buildings are the biggest energy consumers and the biggest generators of greenhouse gasses.

Why is this serious beyond energy consumption and pollution? Transportation units (i.e. cars, trucks, etc.) are typically completely replaced within a 12 year cycle; buildings last 50 to 100 years. Edward Mazria wrote, "With 5 billion square feet of new construction and 5 billion square feet of renovation taking place in the U.S. each year, the potential for reducing energy consumption and carbon dioxide emissions is enormous." Architects have the ability to affect the quality of our environment more than any other group by using both passive and active design. It is time that professional responsibility makes energy efficient design a true priority and that energy codes developed after the 1970's "energy crisis" be seriously revised. Global warming is a real and tremendous threat to our environment.

Intern Development and the ARE:

Until now the use of the Intern Development Program has been primarily the active responsibility of the intern with a passive role for the employer. The total required education of an intern includes a NAAB accredited degree plus completion of the IDP. Many firms large and very small recognize their responsibility to the profession and diligently work to assist their interns. Unfortunately some do little or nothing. One consideration is to develop a structured program for architectural firms to use with their interns. Firms actively using this program would be recognized by NCARB and published on a list of approved participating firms. This list would be made available to architectural students who are seeking employment. This concept is in its genesis. Input will be appreciated.

Conclusion:

We are very pleased to announce that Kathleen Warman, AIA of Kansas City has been reappointed by the Governor to serve a second term. Kathy is a real asset to the Architectural Division and the Board. Congratulations Kathy!

Two quotes to share:

"The only way to manage change is to create it."

"If you think you don't like change, you'll like irrelevance even less."

The profession and the construction industry are in a very rapid process of change, globally and locally. Energy, technology, and service delivery methods are driving change. The Board and NCARB are working diligently to both lead and respond to our evolving role to better protect the health, safety, and welfare of the public.

PROFESSIONAL ENGINEERING DIVISION LETTER

By: Cheri Leigh,
Division Chair

Which Drawing Do I Seal?

Missouri Rule 4 CSR 30-3.030 states that "...the professional engineer shall also affix his/her signature on or through his/her seal and place the

original date under the seal, at the minimum, to the original of each sheet in a set of plans, documents..."

The definition of "original" has been blurred by the change in our delivery system. In contrast to "original" paper and pencil drawings, we can plot up another "original" drawing instantly. However, when a final drawing is reproduced for distribution to a client, the local code authority, or for bidders, it is an original that must be sealed, signed and dated.

There is some thought in the profession that only the drawings submitted to the

local code authorities need to be sealed, possibly because of the requirement of the "wet seal" on those drawings. However, when the drawings are reproduced without any seals on them, and only the few sets for code authorities are sealed, there could be hundreds of sets of drawings issued to bidders, for example, that have no seals at all. This does not meet the rule stated above, as these drawings are not authenticated by the seal.

What then, is the solution? Seal, sign, and date the original drawing that is submitted for reproduction. Then add the "wet seal" to the sets submitted to code authorities. If all of the reproduced drawings have the reproduced seal, some authorities allow the engineer to wet seal only the first sheet of his/her drawings in a set and reference the remainder. For example, sign and seal the drawing and then reference "All structural drawings in this set S1-S10." In a large set of drawings with multiple copies going to codes, this can save the engineer a lot of time and still meet the requirements of the state. Other local jurisdictions may still require wet sealing each sheet regardless of the reproduced seal.

In conclusion, consider yourself to be a member of the public who has a set of your drawings. If the drawings are not sealed, how would you know who is personally responsible for the engineering work? We should be just as proud of our work as the garment workers who advertised "Look for the union label" when purchasing clothing. Not only should we be proud of our work and our credentials, it's the law!

PROFESSIONAL LAND SURVEYING DIVISION LETTER

By: Thomas J. Mathis,
Division Chair

Missouri surveyors will soon be required to keep up with changes to the Missouri Minimum Standards for Property Boundary Surveys. Effective

January 1, 2006, an amendment to our continuing education rule (4 CSR 30-8.020) will require a licensee to have completed a course in Minimum Standards before being eligible to renew his/her license. Since 1996, section one of the rule has required that "each licensed land surveyor, as a condition for renewal of his/her license, shall complete a minimum of twenty (20) professional development units (PDU) each two-year period immediately preceding renewal..."

The new section requires that:

"(A) Of the required professional development units...a minimum of four (4)... shall be in Minimum Standards (4 CSR 30, chapters 16, 17 and 19) during the four (4)-year period immediately preceding renewal."

What this means is that every Missouri surveyor will be required to take a half-day Minimum Standards course every four years. Since the Standards are periodically revised in response to changing technology and land use patterns, it only makes sense that professional land surveyors keep abreast of current requirements. Keeping up with new requirements should not be difficult, because these courses are easily obtained by attending the Missouri Society of Professional Land Surveyors' Minimum Standards Workshop offered each July in a central location. Also, last fall MSPS began offering a 4-hour course during the annual meeting, and in addition, several private continuing education providers will no doubt begin offering appropriate correspondence or distance-learning courses in the near future.

So, if your license is due to expire on December 31, 2006, will you be required to have completed 4 PDUs in Minimum Standards sometime after 2002? Although that's exactly what the new rule says, from a practical standpoint, the answer is "no." The reason: you can't pass a law that's retroactive (folks in the legal profession refer to that as "ex post facto"). However, the Board can require that the requirement be pro-rated to the time the new rule took effect. For example, if you are up for renewal December 31, 2006, the rule will have been in effect for one year so you will be required to have obtained 1/4 of the total requirement,

or one PDU. Likewise if your license expires December 31, 2007, you will be expected to have obtained 2 hours of continuing education units in Minimum Standards to renew your license.

In addition a second provision of the new rule [4 CSR 30-8.02(1)(B)] requires that no more than twelve (12) of the 20 required PDUs be obtained by "non-personal activities". "Non-personal activities" is defined as correspondence courses, video or televised courses, and Internet or e-mail courses. The rationale here is that surveyors seem to learn more from each other than they do from a formal presenter, and personal contact with fellow surveyors can only help to enhance our profession. The bottom line is: every two years surveyors will have to get up off their duffs and attend a real live continuing education seminar for at least one day. There are many sources for "live" programs. These include state and national professional societies, FEMA and other governmental bodies, and many private presenters.

A list of pre-approved continuing education programs is available by visiting the Board's website at <http://pr.mo.gov/apelsla.asp> and clicking on the "continuing education" link. A program does not have to be pre-approved by the Board to count as acceptable credit, as long as it meets the criteria outlined in the rule. If you list a course which was not Board pre-approved and are audited, simply send in a synopsis of the course.

Speaking of audits, the LS Division has decided to send out audit notices with the renewal notices in October instead of January. By January, licenses have already been renewed, and if a surveyor was found to have stretched the truth on his renewal application, the Board was forced to file a formal complaint with the Administrative Hearing Commission, a long and cumbersome process. By requiring continuing education documentation to be submitted with the renewal application, this problem can be avoided.

Although mandatory continuing education can seem to be an unnecessary pain sometimes, there is no doubt that the number of complaints against surveyors dropped significantly after

Missouri instituted her original requirements in 1996. Continuing education tends to protect the general public by assuring the practitioner is familiar with the latest equipment and laws, and enhances the profession by keeping us abreast of a changing technology.

I remember a conversation from a few

LANDSCAPE ARCHITECTURAL DIVISION LETTER

By: Robert N. Hartnett,
Division Chair

years back with a good friend from college who was leaving his position after 10 years as a Landscape Architect to take a new position out of state. At his good bye lunch, his supervisor gave an honest and emotional recap regarding my friend's accomplishments, talked about what a great guy he was, and how much he would be missed by both the supervisor and the organization. After the lunch, my friend told me that his supervisor had never once told him publicly or privately any of those kind words mentioned at the lunch and that if he had, he might not be leaving for this new position.

I was driving home to Lee's Summit in the late evening following the May meeting in St. Louis, thinking that depending on how things shake out, this could be my next to last article as Chair of the LA Division. I was also thinking that the Board staff had once again done an outstanding job of organizing and setting up our quarterly meeting, and that there would be a big hole to fill since Board Investigator Mike Perry had announced that he would be retiring in 2006. Remembering a lesson learned from my old friend, I decided not to wait to the end of my term before thanking the people that do most of the work, the staff at the Professional Registration office in Jefferson City.

Most of us will never have frequent contacts with the Board staff. We get our renewal notice, pay our money, get our

license for another two years, and maybe have a general question every once in a while. If there is more contact than that, generally either the Board or the licensee has issues that need to be resolved, and things have the potential to get a little unpleasant. Some of the more common issues include: 1) How do I complete my application; 2) I moved and did not get my renewal notice (remember to let us know of any address changes); 3) My secretary forgot to mail the check; and, 4) I did not know I had to get my PDH's or PDU's this year. As a result, the Board staff may not always see the best side from our four professions. From my experience I can tell you the staff are true professionals and really do want to provide outstanding customer service to the Missouri licensees while protecting the health, safety and welfare of Missouri. Recent budget issues in Missouri have resulted in fewer financial rewards for all state employees, but I believe our staff still gives 100% every day.

Judy Kempker has been with the Board for 15 years and has been the Executive Director since 2001. I do not know how she does it, but she is always well prepared for our Board meetings, and seems to always have the answers to all questions. If you have ever seen one of our agendas, and considering how diverse the four professions and issues can be, that is quite a task. Sandy Robinson and Debbie Thompson are tasked with getting all the required files to the meeting (enough for two small moving vans), keeping everyone organized, and keeping the official record of the meeting. Debbie also prepares the weekly "Friday Mail Packet" for all Board Members. A little light reading of the week's activities that probably averages 150 pages. In addition to a number of other things, Sandy provides assistance to the Professional Engineering Division, Debbie provides assistance to the Architectural Division and Karen Payne provides assistance to the Professional Land Surveying Division. Karen is another employee who is extremely prepared and very knowledgeable. Not only does she provide assistance to the Professional Land Surveying Division during their Division meeting, she also processes all appli-

cations and issues all licenses for the land surveying and landscape architectural professions. For the last two LA Division meetings, we have had the staff services of Kelly Reinkemeyer. Kelly comes to the Division meetings so prepared; it has made our jobs much easier. She has the agendas and backup documentation in a booklet, with everything sorted and highlighted for easy reference. I think her favorite question is "Anything else you need me to do?"

The staff that generally stays at the office and away from Board meetings is Nancy Plaster, Jan Gilliam, and the newest members of the team - Brianne Johnson and Jane Coffman. Nancy and Jan monitor all applications and exams for the architectural and engineering professions of the Board. Nancy has been with the Board for 24 years and Jan 9 years. Both are very dedicated and knowledgeable employees. Brianne and Jane process the renewals and reinstatements for all

four professions. Each one of them is very good at what they do and integral to the mission of the Board.

Last, but not least, is Board Investigator Mike Perry. Like the old saying about the 60 Minutes TV crew showing up at your office, and as a result, that you are probably not going to have a very good day. Same with Mike, nobody wants to see him show up on their door step. Mike has 18 years of law enforcement experience and 8 ½ years as the Board Investigator. He generally investigates matters when a complaint has been filed regarding some statute or rule violation. Because most of us stay out of this kind of trouble, 99% of us will luckily never meet Mike. He approaches his duties with determination and manages to keep his sense of humor. If you ever meet Mike, ask him about going undercover disguised as a bush. He will be missed when he retires next year.

Next time you talk to Judy, Sandy, Mike, Nancy, Jan, Karen, Debbie, Kelly Brianne, or Jane tell them thanks for all their hard work and effort. This would not be possible without them.

Disclaimer: The articles in this newsletter are the work and opinion of the individual authors and do not necessarily reflect the official opinion or position of the Board.

Warman and Gray Reappointed

We are extremely pleased to report that both, Kathleen (Kathy) A. Warman, AIA and Michael (Mike) D. Gray, PLS, have been reappointed by Governor Matt Blunt to serve a second term on the Board. Ms. Warman serves as a member of the Architectural Division of the Board and Mr. Gray serves as a member of the Professional Land Surveying Division of the Board. Ms. Warman and Mr. Gray are very dedicated to their professions and are highly respected members of the Board.

FAREWELL TO JOSEPHINE EMERICK!

On behalf of the Missouri Board for Architects, Professional Engineers, Professional Land Surveyors and Landscape Architects, we would like to sincerely thank Ms. Josephine (Jo) Emerick for her dedication to the Board and exemplary services rendered to the people of the state of Missouri while serving on the Board. Jo served as a member of the Professional Engineering Division from January 9, 1997 to July 18, 2005. From May 5, 2002 to April 27, 2005, she also served as Chair of the Professional Engineering Division.

The work ethics and commitment on the part of Jo will certainly be missed. However, we would like to take this opportunity to wish her the very best with her future endeavors. We would also like to take this opportunity to congratulate Jo for being honored as the 2004 Private Sector Engineer by the Missouri Chapter of the American Public Works Association. This honor was bestowed on Ms. Emerick during the Chapter's Fall Meeting at The Lake of the Ozarks. Individuals receiving this outstanding recognition will have met the following criteria:

- The individual will be in good standing in the Chapter with substantial contributions to the profession
- Is a licensed Professional Engineer with at least ten (10) years experience.
- Is currently employed by a consulting firm or has worked most of his or her career in the private sector consulting business.

The award recognizes the importance of professional attainment in the advancement of Civil Engineering. It also acknowledges the important role the Private Sector plays in providing Public Works Facilities, services and projects. Each individual selected for this honor is presented with a Plaque of Recognition during the Chapter Meeting.

The Board is very proud of Jo and extremely pleased that she was recognized for her professionalism and outstanding accomplishments.

NEW BOARD MEMBER

C. Royce Fugate, City Administrator/City Engineer for the City of West Plains, Missouri, has been appointed by Governor Matt Blunt to serve as a member of the Professional Engineering Division of the Missouri Board for Architects, Professional Engineers, Professional Land Surveyors and Landscape Architects. Mr. Fugate's appointment went into effect on July 19, 2005.

Mr. Fugate has been licensed as a Professional Engineer in Missouri since January 18, 1965. He graduated from the University of Kansas in 1959 with a Bachelor of Science in Civil Engineering. Mr. Fugate is also licensed as a Professional Engineer in the state of Kansas and has been since 1965. He currently serves as the City Administrator/City Engineer for the City of West Plains, which is a progressive, growing community of approximately 11,000 residents. Since Mr. Fugate's employment with the City in June of 1996, he has been responsible for the success of a number of major accomplishments. Prior to his position with the City, Mr. Fugate had a 38-year career with the Missouri Department of Transportation serving in various positions, including a 15-year span as the Field Materials Engineering Supervisor. Career goals focused on development and implementation of new materials, new equipment, new procedures, new management processes and new ways of doing business. He served on the Implementation Team, bringing MoDOT to the forefront in quality improvement. He was a member of various task forces and quality circles which were recognized by the Governor's Office for productivity and achievement. Mr. Fugate was appointed as the first Value Engineering Administrator, forming and setting up the current Value Engineering (VE) Section which has saved MoDOT millions of dollars. He also formed and set up MoDOT's Division of Research, Development and Technology.

Missouri statute provides that Board Members shall serve a term of four years or until his/her successor is appointed by the Governor. Mr. Fugate replaces Josephine (Jo) Emerick, St. Louis, Missouri whose term expired.

State-Specific Exam Committee Meets

By: Dr. Richard Elgin, PLS, PE

The Missouri Board's State-Specific Land Surveying Exam Committee met earlier this year on the campus of the University of Missouri-Rolla. Chaired by Dr. Richard Elgin, the Committee is made up of sixteen Professional Land Surveyors from different practice backgrounds and geographic areas of the state. The Committee meets periodically to review the appropriateness of the materials and syllabus of the State-Specific Exam, which is one of the exams required for licensure as a Missouri Professional Land Surveyor. The group also reviews each question in the bank of questions used on the exam and also writes new questions. "The Board appreciates the time and dedication of this group," said Jim Mathis, PLS, Chairman of the Land Surveying Division of the Board. "The Board's purpose is to make the exam complete, fair and appropriate and to assure competence of those who we license. This group helps us achieve that goal," he added.

Exam content and the percentage of subject areas included on the exam are based on the definition of "Land Surveying" (from Chapter 327 RSMo) and "what surveyors do." One of the outcomes of the meeting was a recommendation that all Missouri Professional Land Surveyors be polled as to their practice areas. Based on the results of that study, future exam content may change. If you are a Missouri Professional Land Surveyor, you should have received the Board's questionnaire in early March. The deadline for completing and returning the questionnaire was May 1st. Input from the licensees is very important; therefore, the Board sincerely thanks those who took the time out of their busy schedules to complete and return the questionnaire.

Thank You!

The Board is very grateful to the members of the Missouri Board's State-Specific Land Surveying Exam Committee who were able to attend and who participated in the Land Surveyor Exam Workshop which was held on January 22, 2005 in Rolla, Missouri. We extend our sincere appreciation to the following individuals for their time, dedication and service:

Mike Flowers
Bill Kankolinski
Dan Lashley
Don Martin
Rick Stewart
Pete Stevens

Bob Shotts
Gary Bockman
Craig Ruble
Dan Govero
Don Clinkenbeard
Jim Mathis (Board Member)

MESSAGE FROM THE DIVISION DIRECTOR

The Division of Professional Registration recently hired Tom Reichard as Director of Budget and Legislation. Tom is a lifelong resident of Jefferson City and brings a wealth of business and management experience to the Division having owned and operated an office supply company for over twenty years. He and his wife, Cindy, have four children; Alan-27, Lisa-25, Katie-23, and Mark-16. Besides his children, he enjoys golf, fishing and tinkering with old cars.

In his new role, Tom will serve as the liaison for budget and legislative items between the professional boards, committees and commissions within the Division, the Department of Economic Development and the Missouri General Assembly. He has already begun working with each of the boards, committees and commissions to develop and prepare both legislation and budget items for the upcoming 2006 session.

We are excited to have Tom on board and welcome him to the Division!

Sincerely,

A handwritten signature in cursive script that reads "Alison Craighead".

Alison Craighead

IS YOUR STATUTE/RULE BOOK OUTDATED?

For the most up-to-date copy of the law and rules (Chapter 327 RSMo and 4 CSR), please go to the Board's website:

<http://pr.mo.gov/apelsla.asp>

Once there, click on "Statutes" to view the law (Chapter 327 RSMo); or, "Rules and Regulations" to view the rules (4 CSR).

Hard copies of the booklet are available upon request. If you would like a hard copy mailed to you, please send us an email at moapels@pr.mo.gov or call us at (573) 751-0047.

Failure to Provide Immediate Personal Supervision	5
Other violation	1

Total Number of New Complaints filed in 2004 - 127

Breakdown of Complaint Files Closed in 2004

Formal censure based on cause of discipline	0
Placed on probation	8
Suspensions	0
Suspension followed by probation	1
Injunction obtained	1
Insufficient evidence of violation, no action taken	39
License revoked	2
Not within the jurisdiction of the Board	7
Satisfactory completion of probation	3
Voluntary surrender of license	1
Complaint was withdrawn by complainant	1
Corporate Certificate of Authority was obtained	16
Individual agreed to NOT renew license in lieu discipline(Inactive Status)	1
Application for relicensure was denied	0
Acceptance of settlement offer	0
Per decision of the court	0
Voluntary reporting completed	0
Written assurances to either cease and desist or to comply w/Chapter 327 received	18
Letter from Board advising of violation but no action taken	17
Letter of Reprimand	0
Federal Exemption Clause	0
Other Action	6

Total Number of Complaint Files Closed in 2004: 121

UNLICENSED PRACTICE

As you can see in 2004, the Board has had 39 complaints filed against individuals and 38 complaints filed against corporations which were charged with practicing architecture, professional engineering, land surveying and/or landscape architecture without being properly licensed. If an individual or corporation refuses to voluntarily cease and desist all illegal activities and to conduct all future activities in compliance with Chapter 327, then the Board can request the Attorney General's office to file suit in the appropriate circuit court seeking an injunction to restrain that individual or corporation from practicing architecture, professional engineering, land surveying and/or landscape architecture without a license. Currently, the Board has authorized the Office of the Attorney General to file one case in Circuit Court to obtain an injunction to restrain illegal practice of architecture, professional engineering, land surveying and/or landscape architecture.

CLARIFICATION OF THE APPROVED CALCULATOR LIST

In November, NCEES sent out a press release listing the approved calculators for the April 2005 and October 2005 examination administrations. At its 2004 Annual Meeting, NCEES voted to revise the examination policy concerning materials permitted in the examination room so that only models of calculators specified by NCEES are allowed.

Some state/jurisdiction boards have asked for further clarification. The following models are the only calculators that will be permitted in the examination room for the April and October 2005 exam administrations: (Note that clarifications to list are in bold)

- Hewlett Packard - HP 33s
- Hewlett Packard - HP 9s
- Casio - **FX 115 MS** and **FX 115 MS Plus** (**some models may have a "- SR" at the end, they are okay as well**)
- Texas Instruments - TI 30X IIS and TI 30X IIB
- Texas Instruments - TI 36X

Please distribute the above list accordingly. For more information, please see the Calculator Policy at www.ncees.org or call NCEES at 864-654-6824.

The National Council of Examiners for Engineering and Surveying develops licensing examinations for the engineering and surveying professions. These examinations are used by engineering and surveying licensing boards across the United States as part of their candidate assessment process. NCEES also provides examination scoring and administration services to licensing boards, as well as a variety of other products and services to engineering and surveying professionals. NCEES headquarters is located in Clemson, S.C.

DISCIPLINARY ACTIONS

DISCLAIMER: Every effort has been made to ensure that the following enforcement information is correct. However, this information should not be relied upon without verification from the Board office. It should be noted that the names of companies and individuals listed may be similar to the names of the parties who have not had enforcement actions taken against them. Discipline orders are public data and copies may be obtained by contacting the Board office. Pursuant to Chapter 327, RSMo, a licensee is entitled to engage in the practice of architecture, engineering, land surveying or landscape architecture during his/her probationary period providing that the licensee adheres to all of the terms and conditions of the Order. However, a licensee whose license has been suspended or revoked is not entitled to engage in the practice of architecture, engineering, land surveying or landscape architecture.

REVOCATION

FRANK J. SCHMIDT, LS-1022 (Inactive Status)

St. Louis, Missouri

Summary: As previously reported in the Board's Winter 2004 Dimensions newsletter, Mr. Schmidt's professional land surveying license was placed on two (2) years probation commencing on July 26, 2004. As conditions of his probation, Mr. Schmidt was to: 1) timely renew his license, pay all fees required for licensure and comply with all other Board requirements necessary to maintain his license in a current and active state; and, 2) comply with all provision of Chapter 327, RSMo, all rules and regulations of the Board and all federal and state laws, rules and regulations.

Cause for Discipline: Mr. Schmidt failed to comply with Section 327.351, RSMo 2000 and 4 CSR 30-8.020(5) by maintaining and retaining records of his completion of required units of satisfactory professional development ("PDUs") and assisting the Board in its audit to verify his compliance with PDU requirements by providing timely responses to the Board's inquiries regarding his compliance. Mr. Schmidt also failed to timely renew and to timely pay all fees required to renew his professional land surveyor's license for the period beginning January 1, 2005. Further, despite not having a current license, Mr. Schmidt engaged in the practice of professional land surveying in January 2005.

Board Action: The Board voted to revoke Mr. Schmidt's professional land surveying license, number LS-1022. An Order was issued on June 6, 2005 to be effective immediately. Please note that this disciplinary action is currently under appeal.

JERRY E. TUCKER, LS-2582 (Expired Status)

Pierce City, Missouri

Summary: Jerry E. Tucker's professional land surveying license expired on December 31, 2001 and he applied for relicensure on August 15, 2002. Thereafter, on December 31, 2003, Mr. Tucker's professional land surveying license again expired and has not been renewed or made current. During the time period that Mr. Tucker's professional land surveying license had lapsed, he signed and sealed surveys for a client. These surveys also failed to meet current Missouri Minimum Standards for Property Boundary Surveys.

Cause for Discipline: The Administrative Hearing Commission found that Mr. Tucker is subject to discipline under Sections 327.441.2(5), (6) and (13), RSMo 2000 because he signed and sealed surveys while his professional land surveying license was lapsed and these surveys failed to meet the current Missouri Minimum Standards for Property Boundary Surveys.

Board Action: The Board voted to revoke Mr. Tucker's professional land surveying license, number LS-2582. An Order was issued on June 6, 2005 to be effective immediately.

SUSPENSION

BRUCE F. BIRD, E-12144

Shawnee, Kansas

Summary: Bruce F. Bird affixed his engineer's seal to plans that were not prepared by him or under his immediate supervision.

Cause for Discipline: The Administrative Hearing Commission found that Mr. Bird is subject to discipline under Section 327.441.2(6), Violation of, or assisting or enabling any person to violate, any provision of Section 327, RSMo, or of any lawful rule or regulation adopted pursuant to Section 327, RSMo, 2000.

Board Action: The Board voted to suspend Mr. Bird's license for a period of three (3) years commencing December 7, 2004 and ending December 6, 2007 followed by probation for a period of one (1) year to commence on December 7, 2007 and ending December 6, 2008. Please note that this disciplinary action is currently under appeal. Mr. Bird's suspension was stayed effective May 11, 2005.

PROBATION

CHARLES ERIC ANDERSON, E-23080

St. Charles, Missouri

Summary: Charles Eric Anderson was assisting and enabling an unlicensed person in the practice of engineering.

Cause for Discipline: Mr. Anderson violated 327.441.2(5), (6), (7), (10) and (13), RSMo 2000, by signing and sealing plans not prepared by Mr. Anderson or under his immediate personal supervision and by assisting or enabling another in the unlicensed practice of engineering.

Board Action: The Administrative Hearing Commission issued a Consent Order on October 29, 2004, concluding that Mr. Anderson is subject to discipline. By agreement of the parties, Mr. Anderson's professional engineering license was placed on probation for a period of two (2) years commencing on October 29, 2004 and ending October 28, 2006.

IRVIN R. STACK, E-19612

d/b/a Stack & Associates, Inc.
St. James, Missouri

Summary: Irvin R. Stack practiced outside his field of expertise and he assisted Stack & Associates, Inc. to provide engineering services when it held no valid certificate of authority to do so.

Cause for Discipline: Mr. Stack violated Chapter 327.441.2(6) and (10), RSMo 2000 by practicing outside his field of expertise and by assisting Stack & Associates, Inc. to provide engineering services when it held no valid certificate of authority to do so.

Board Action: The Administrative Hearing Commission issued a Consent Order on May 5, 2005 concluding that Mr. Stack is subject to discipline. By agreement of the parties, Mr. Stack's professional engineering license was placed on probation for a period of five (5) years commencing on May 5, 2005 and ending on May 4, 2010.

SURRENDER OF LICENSE

BENNIE W. GOFORTH, LS-2490

Midway, Arkansas

Summary: Bennie W. Goforth was employed to survey Sections 19 and 30, Township 23 North, Range 15 West, Ozark County, Missouri. Mr. Goforth reestablished the quarter corner common to Sections 19 and 30, Township 23 North, Range 14 West, Ozark County, Missouri. Mr. Goforth failed to file corner documents with the Missouri Department of Natural Resources Land Survey Program for the corners he reestablished in this survey.

Cause for Discipline: The Administrative Hearing Commission issued a Consent Order concluding Mr. Goforth is subject to discipline. Mr. Goforth violated Section 60.321 and 10 CSR 30-3.030 by failing to file a corner document for the corner he established in a survey; Violation of Section 60.321 and 10 CSR 30-3.030 demonstrates misconduct in the performance of the functions and duties of a licensed professional land surveyor providing cause for discipline pursuant to Section 327.441.2(5), RSMo and Mr. Goforth's failure to file a corner document with the Missouri Department of Natural Resources for the corner he reestablished in a survey constitutes a violation of a professional trust and confidence, providing cause to discipline pursuant to Section 327.441.2(13), RSMo.

Board Action: On November 5, 2004, Mr. Goforth entered into a Settlement Agreement with the Board thereby surrendering his Professional Land Surveying license.

HOUSE BILL 600 SUSPENSIONS

CARL J. BOSSERT, E-13966

St. Louis, Missouri

Summary and Board Action: Mr. Bossert's professional engineering license was suspended pursuant to Section 324.010, RSMo from January 26, 2005 to April 8, 2005.

ROBERT A. WARD, E-7287

St. Louis, Missouri

Summary and Board Action: Mr. Ward's professional engineering license was suspended pursuant to Section 324.010, RSMo from January 26, 2005 to March 22, 2005.

RULE UPDATE

EFFECTIVE JUNE 30, 2005, BOARD RULES 4 CSR 30-5.060 AND 4 CSR 30-12.010 WERE AMENDED TO READ AS FOLLOWS:

4 CSR 30-5.060 Reexamination.Architects

PURPOSE: This rule permits unlimited opportunities for retake of the architectural examinations.

(1) Applicants who fail to pass the architectural examinations will be allowed unlimited opportunities for reexamination in accordance with the rolling clockstandards established by the National Council of Architectural Registration Boards (NCARB).

AUTHORITY: section 327.041, RSMo Supp. 2004 and 327.151, RSMo 2000.* Original rule filed Aug. 22, 1973, effective Sept. 22, 1973. Amended: Filed Dec. 8, 1981, effective March 11, 1982. Amended: Filed Sept. 13, 1983, effective Dec. 11, 1983. Amended: Filed Dec. 1, 2004, effective June 30, 2005.

*Original authority: 327.041, RSMo 1969, amended 1981, 1986, 1989, 1993, 1995, 1991, 2001 and 327.151, RSMo 1969, amended 1981, 1999.

4 CSR 30-12.010 Public Complaint Handling and Disposition Procedure

PURPOSE: This rule establishes a procedure for the receipt, handling and disposition of public complaints by the board, pursuant to the mandate of section 4.16(6) of the Omnibus State Reorganization Act of 1974, Appendix B, RSMo 1986.

(1) The Missouri Board for Architects, Professional Engineers, Professional Land Surveyors, and Landscape Architects shall receive and process each complaint made against any licensee or certificate holder of the board or unlicensed individual or entity, which complaint alleges certain acts or practices which may constitute one (1) or more violations of the provisions of Chapter 327, RSMo. Any member of the public or the profession or any federal, state or local official, may make and file a complaint with the board. Complaints shall be received from sources without the state of Missouri and processed in the same manner as those originating within Missouri. No member of the Board for Architects, Professional Engineers, Professional Land Surveyors, and Landscape Architects shall file a complaint with this board while s/he holds that office, unless that member excuses him/herself from further board deliberations or activity concerning the matters alleged within that complaint. The executive director or any staff member of the board may file a complaint pursuant to this rule in the same manner as any member of the public.

(2) Complaints should be mailed or delivered to the following address: Missouri Board for Architects, Professional Engineers, Professional Land Surveyors, and Landscape Architects, PO Box 184, Jefferson City, MO 65102.

However, actual receipt of the complaint by the board at its administrative offices in any manner shall be sufficient. Complaint may be made based upon personal knowledge or upon information and belief, reciting information received from other sources.

(3) All complaints shall be made in writing and shall fully identify the complainant by name and address. Complaints may be made on forms provided by the board and are available upon request. Oral or telephone communications will not be considered or processed as complaints, but the person making such communications will be provided with a complaint form and requested to complete it and return it to the board. Any member of the administrative staff of the board may make and file a complaint based upon information and belief, in reliance upon oral, telephone or written communications received by the board, unless those communications are believed by the staff member to be false.

(4) Each complaint received under this rule shall be logged in a book maintained by the board for that purpose. Complaints shall be logged in consecutive order as received. The logbook shall contain a record of each complainant's name and address; the name and address of the subject(s) of the complaint; the date each complaint is received by the board; a brief statement of the acts complained of, including the name of any person injured or victimized by the alleged acts or practices; a notation whether the complaint resulted in its dismissal by the board of informal charges being filed with the Administrative Hearing Commission; and the ultimate disposition of the complaint. This logbook shall be a closed record of the board, but shall be available for inspection at the board's offices only by state senators, representatives or by qualified officials within the executive branch of Missouri government having supervisory, auditing, reporting or budgetary responsibilities or control over the board. Only upon receipt of a written request from a state senator, representative or qualified official, which specifically assures that the request is directly related to their duties as a state senator, representative or official of the executive branch of Missouri government, shall they be permitted to inspect the logbook.

(5) Each complaint shall be acknowledged in writing and investigated by the board. When the complaint is received, the board shall write the complainant informing him/her of the fact and stating that the matter is being referred to the board for consideration at its next regularly scheduled meeting. Later, the complainant shall be informed in writing of the ultimate disposition of the complaint, excluding judicial appeals

and shall be provided with copies of the decisions, if any, of the Administrative Hearing Commission and the board at that time. Provided, that the provisions of this subsection shall not apply to complaints filed by staff members of the board, based on information and belief, acting in reliance on third-party information received by the board.

(6) Both the complaint and any information obtained as a result of the investigation of the complaint shall be considered a closed record of the board and shall not be available for inspection by the public. During the investigative state, the board and its executive staff shall keep the complaint and the fact of its existence confidential to the extent practicable. However, a copy of the complaint and any attachments shall be provided to any person who is the subject of that complaint or his/her legal counsel, upon written request to the board.

(7) This rule shall be deemed to limit the board's authority to file a complaint with the Administrative Hearing Commission charging a licensee or certificate holder of the board with any actionable conduct or violation, whether or not such a complaint exceeds the scope of the acts charged in a preliminary public complaint filed with the board and whether or not any public complaint has been filed with the board.

(8) The board interprets this rule, as required by law, to exist for the benefits of those members of the public who submit complaints to the board and for those persons or entities within the legislative and executive branches of government having supervisory or other responsibilities or control over the professional licensing boards. This rule is not deemed to protect or inure to the benefit of those licensees or certificate holders or other persons against whom the board has instituted or may institute administrative or judicial proceedings concerning possible violations or the provisions of Chapter 327, RSMo.

AUTHORITY: section 327.041 and 620.010.14(7), RSMo Supp. 2004.* Original rule filed Dec. 8, 1981, effective March 11, 1982. Amended: Filed Sept. 1, 1987, effective Nov. 23, 1987. Amended: Filed Oct. 30, 2002, effective April 30, 2003. Amended: Filed Nov. 1, 2004, effective June 30, 2005.

*Original authority: 327.041, RSMo 1969, amended 1981, 1986, 1989, 1993, 1995, 1999, 2001 and 620.010, RSMo 1973, amended 1981, 1983, 1986, 1989, 1990, 1993, 1994, 1995, 1999, 2001.
